

## IM350RC / LED Search light

After a lot of testing, Imax is pleased to announce officially the launch of its latest new development LED search light.

This IM350RC (left) is fitted with one power LED 120 Watt and is just as strong as a 1000 Watt/230V halogen lamp (right).

Left the normal halogen 1000 Watt lamp and right the power LED 120 Watt. The new power LED is 5000K, what gives a slightly blue bright color. The halogen search light (left side) is 3500 K (more red-coloured).

**Advantages compare to the halogen search light:**

The LED lamp doesn't need to be replaced for at least 7 years;

Stainless steel and IP67;

Lower energy costs;

Due to a shorter wave length, the LED lamp has a higher penetration ability;

The LED lamp can withstand more vibration than the halogen lamp.
