

# Fasflo Mini

# VIKOMA

Protecting our environment over 50 years

Quality  
Reliability  
Innovation

Ensuring an effective solution to your oil spill requirements!

- Ideal for fast flowing such as in rivers, streams and industrial outlets
- Removes floating oils from the water surface
- Compact and lightweight construction
- Recovers a wide range of oils

Advancing skimmers are designed for use in fast flowing waters, either when used as part of a sweep system alongside an oil response vessel, or in rivers and streams where the flow can be channelled through the skimmer.

Fasflo Mini skimmers are constructed from marine grade aluminium, GRP and stainless steel fixings. The skimmer is easy to deploy and has very few moving parts, so requires minimal maintenance.

The innovative design slows the water inside the skimmer, bringing the oil to the surface which is then recovered by a self adjusting weir at the back of the skimmer, where it is pumped away. An adjustable integral hydroplane ensures correct trim of the Fasflo when in operation.

The Fasflo Mini skimmer is a smaller version of the Fasflo Maxi advancing skimmer. It can recover oils at a rate of up to 25m<sup>3</sup> per hour, with the recommended pump. Its compact design and lightweight construction make it portable and easy to deploy in difficult to access environments.

The simplicity of the design requires minimal maintenance and can be deployed as a temporary or permanent recovery solution in currents of up to 4 knots. Diversionary booms can be attached to the mouth of the skimmer to increase the collection width.

The adjustable hydroplane enables the dynamic positioning of the skimmer for the best performance and most efficient skimming.

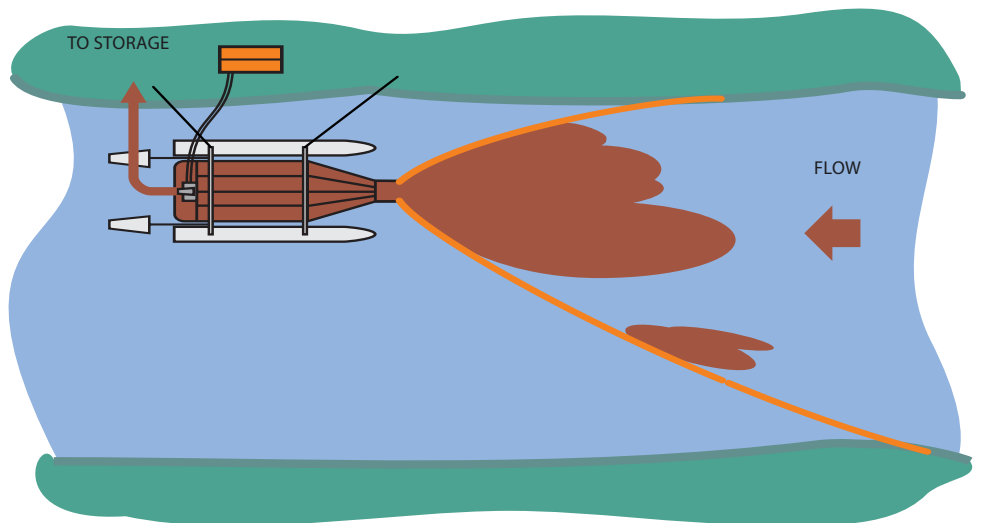

The Fasflo Mini skimming system has a remote positive displacement pump connected to the oil collection sump in the skimmer to discharge collected oils.

**Product Benefits:**

- Advancing skimmer system recovers a wide range of oils
- Compact design and lightweight construction

Recovery Capacity
25m <sup>3</sup> per hour
System components
Fasflo Mini Skimmer Head Deflector Booms. V190D Transfer Pump. Hose Kit.
Optional extras
Boom System sweep arms
